

"Philip" "Khor"

Data Scientist

Penang, Malaysia · pk.qa@outlook.com · philipscurve.com · github.com/philip-khor · linkedin.com/in/philip-khor

Summary

Economist by training, data scientist by practice. Experience spans ESG ratings methodology, sustainability disclosure standards, LLM systems, policy analysis, credit risk modelling, fair ML, and applied microeconometrics.

Work Experience

SustenyX

Remote

Technical Consultant Mar 2026 - May 2026

- Provided post-departure architecture and engineering continuity for the ESG gap analysis platform
- Covered pipeline design, code review, and developer knowledge transfer

SustenyX

Remote

Sustainability Intelligence & Compliance Manager June 2025 - Feb 2026

- Translated FTSE Russell ratings methodology and IFRS Sustainability Disclosure Standards into AI-powered intelligence systems, engagement protocols, and commercial offerings for capital market clients across Southeast Asia
- Defined the subject-matter logic for LLM-based ESG gap analysis workflows, including pipeline architecture, NLP strategies for keyword extraction from company disclosures, and code review for modularity
- Acted as the technical bridge for sales and marketing; mapped the regional regulatory landscape for product expansion; coordinated localisation across target markets
- Remediated infrastructure security gaps, bringing AWS environment compliance from 70% to 92%

SustenyX

Remote

Sustainable Finance Consultant Aug 2024 - June 2025

- Conducted in-depth research on ESG ratings, standards and frameworks, and competitor analysis
- Developed reports, presentations, and thought leadership pieces on key sustainability topics for internal and external audiences
- Utilized data analysis and AI tools to refine ESG product development and recommendation models

Penang Institute

George Town, Penang

Visiting Data Scientist 2024

- Developing dashboards covering local socioeconomic statistics and maintaining data pipelines
- Streamlined data pipelines to reduce the time taken for updates
- Redesign dashboards to improve clarity of data visualisations

Penang Institute

George Town, Penang

Statistician, Socioeconomics and Statistics Programme 2023

- In addition to the above, support the transition of Penang Monthly's statistics brief towards a more visual format with timely reviews and internal training
- Contributing to Penang Monthly statistics articles
- Prepare research reports and statistical analysis on key local socioeconomic issues
- Organised internal workshop on use of large language models in think-tank work

CIMB Bank Berhad

Kuala Lumpur

Manager, Regional Advanced Risk Modelling, Group Risk March 2020 - May 2022

- Review and enhance model development processes to meet regulatory expectations for the use of advanced modelling methodologies in the development of Basel and IFRS9 credit risk ratings models.
- Communicate model outcomes to stakeholders to ensure that model behaviour is consistent with business expectations.
- Prepare and enhance model documentation for machine learning models to meet regulatory expectations.
- Work with model validators to address gaps in model development.
- Work with data engineers to ensure appropriateness of feature derivation logic.
- Develop scripts and internal package with R to automate analysis on AutoML platform.
- Liaise with vendor to ensure comprehensive understanding of AutoML platform processes.
- Upskill risk modellers to ensure understanding of machine learning algorithms, model explainability and fairness considerations for credit risk ratings models.

SkyMind AI Berhad

George Town, Penang

Technical Writer October 2019 - December 2019

- Prepared documentation on internally developed model deployment software to support internal and external users.

- Provided editing assistance for development of training materials.
- Drove and provided support for community engagement events.

GRID Inc.

Minato-ku, Tokyo

Data Scientist Intern May 2019 - August 2019

- Trained real-time object detection and image segmentation models for use in agriculture using YOLOv2, SSD and Mask R-CNN deep learning architectures with internally built framework.
- Delivered substantial improvement on the accuracy of number of trees counted, relative to previously built internal model.
- Developed metrics to evaluate model to align with client objectives.
- Developed pipeline consisting of Python command line interfaces to facilitate pre-processing, partitioning and post-processing of image and annotation data.

The Center of Applied Data Science

Bangsar South, Kuala Lumpur

Data Scientist Associate July 2018 - May 2019

- Delivered over 100 hours in training sessions for Microsoft Excel, R for Analytics, Tableau, Statistics and Data Storytelling.
- Developed training products in the areas of statistics, exploratory analysis, data visualization and machine learning using spreadsheets, R, Python and Tableau delivered through tools such as Jupyter Notebooks and R Markdown, focusing on commercial applications of data science.
- Led development teams for Excel Analytics and Regression Modelling and Evaluation modules.
- Core developer of introductory and intermediate Statistics and R for Analytics modules.
- Worked with teams to develop and deliver training material for Natural Language Processing, Neural Networks, Data Visualisation with Tableau, A/B/n Testing and Time Series Analytics and Forecasting modules.
- Developed internal conventions for material formatting.

Penang Institute

George Town, Penang

Research Assistant: Economics Studies Dec 2015 - Jan 2016, Aug 2016 - Jan 2017

- Provided key research assistance for the Penang Skilled Workforce Study project.
- Scheduled and performed interviews with Human Resource, company executives and other governmental and non-governmental stakeholders.
- Prepared reports and edited report text and formatting.
- Emcee at the forum Budgeting Priorities in a Challenging Economic Environment (Nov 2016).
- Contributed to the Penang Economic and Development Report 2015/2016 and the Institute's evaluation of the Trans-Pacific Partnership Agreement (TPPA).

Projects

Key Penang Statistics

Penang Institute

2023 - 2024

- 12 dashboards providing numerical insights into key socioeconomic issues in Penang for public consumption

Penang Strategy for Economic Ecosystem Development

Penang Institute

2023

- Design visualisations of key economic indicators at sector and aggregate level
- Develop policy recommendations adapting various policy documents to local context

Estimating Penang's Economic Growth

Penang Institute

2023

- Developing regional input-output models to estimate effects of economic shocks to Penang's GDP
- Re-implemented Excel model in Python
- Assisted with acquisition of local data

Penang Economic and Development Report 2022/23

Penang Institute

Forthcoming 2023

- Prepared writeups for water and electricity, global business services, waste management, housing and climate change in Penang
- Assisted with acquisition of data and editing

Families on the Edge, Penang: mixed methods research on the impact of COVID-19 and the rising cost of living on children and women in low-income families

UNICEF/Penang Institute

2024

- Statistical analysis including data preparation and visualisation
- Prepared writeup and editing in line with UN style guide

Family background and child health: the role of socioeconomic status and skills

University of Wollongong

Honours thesis 2017

- Econometric analysis of the relationship between parental income and child health status in Australia using two large Australian longitudinal datasets.
- Used data from the Household, Income and Labour Dynamics in Australia Survey (HILDA) and the Longitudinal Study of Australian Children (LSAC) to replicate prior longitudinal results on the effect of parental income on child health.
- Developed a novel identification strategy to estimate the effect of parental resources on child health.

Penang skilled workforce study: labour skills for growth and change

Penang Institute

Aug 2017 - Jan 2017

- Identification of skill gaps and skill shortages in major Penang economic sectors.
- Conducted and assisted with qualitative interviews with industry stakeholders and human resource personnel.
- Assisted in the development of questionnaires for data collection and strategies to improve response rates.
- Assisted in data analysis and designing data visualizations.

Education

Bachelor of Commerce (Honours)

NSW, Australia

University of Wollongong 2017

- Received the 2017 Honours Scholarship from the Faculty of Business based on academic performance, research and leadership potential.
- Undertook a research project as part of coursework for Advanced Macroeconomic Theory (Health and wealth: economic growth with endogenous health and human capital).

Bachelor of Commerce (Dean's Scholar)

NSW, Australia

University of Wollongong 2014-2016

- Awarded the Illawarra Regional Information Services John Steinke Prize in Economics (April 2017) for achieving the highest mark in 3rd-year Economics subjects.
- Awarded the Kenneth A. Blakey Prize (March 2015) for achieving the highest aggregate mark in Microeconomic Theory and Policy.
- Consistently placed in the Dean's Merit List (2014-2017), which admits the top 5% of students in the Faculty of Business.
- Awarded the Business International Academic Merit Scholarship and the Undergraduate Excellence Scholarship in recognition of academic achievement.
- Admitted to the Dean's Scholar program in recognition of high academic achievement.

Diploma in Business Studies

George Town, Penang

Tunku Abdul Rahman University of Management & Technology (formerly Tunku Abdul Rahman University College) 2012-2014

- Received the Merit Scholarship amounting to 100% of the tuition fees for the length of the program in recognition of prior academic performance.
- Awarded Book Prize for overall academic performance.

Qualifications

Bank Risk Management

Kuala Lumpur

Asian Institute of Chartered Bankers 2022

- Provide banking professionals who aspire to be risk specialists with a comprehensive understanding of bank risk management activities.

Data Scientist Trainee

Bangsar South, Kuala Lumpur

ASEAN Data Analytics eXchange 2018

- Data science finishing school for graduates covering R and Python programming modules, statistics, data preprocessing, machine learning, data visualisation with programming packages (ggplot2, matplotlib, seaborn) and Tableau, forecasting and natural language processing.
